

The levels of the universe (an upgradable sketch) to the unredeemed spirit.

Spiritual levels (supporting and leading levels)	Subtle levels (intermediate levels, link)	gross material level
Realities of highest reality degree and of lowest relativity degree	Intermediate levels in terms of reality and of relativity	Reality of lowest reality degree and of highest relativity degree
Spirit = cause	Subtle realm = action principle	Body = manifestation/effect
Higher-dimensional hyperspaces; > 5 dimensions (space-time-spirit dimensions) Space and time are means for the spirit and freely interchangeable and yet fictitious	≥ (?) 5-dimensional space-time Time and space interchangeable (?) and in the weak coupling (?)	4-dimensional space-time Limitations of the physical phenomena give the impression that time and space are coupled to each other
Higher dimensional hyper-worlds (non-physical worlds)	Sections of the higher- dimensional hyper-worlds, imaginary worlds (non-physical worlds)	Section of 5- and higher-dimensional worlds, physical world
Spiritual sizes: Spiritual energy (Psi energy, Reiki, ...)	Imaginary sizes (non-physical): Energy (orgone, prana, aura, Kundalini, Chakras as transmit- ting and receiving stations, ether, tachyons, biophotons, ...)	Physical sizes: Energy (atomic and subatomic energy particles, light, radiation, electricity, ...)
Fields (indistinguishable from spiritual energy, thought fields) No mass (pure energy)	Fields (morphic fields, Akashic records, ...) Imaginary mass (elementals = thought forms, tachyons, ...)	Fields (Gravitational fields, electromag- netic fields, weak and strong nuclear fields) mass (particles of matter)
Causative levels (functional mirroring of Heaven)	Levels of the active principle	Level of effects and manifestations, based on the spiritual processes
Spiritual laws: Thoughts can create all sorts of things and impossible things	Subtle laws , law of transformation and change	Material laws , laws of conversion, equivalence of mass and energy, equivalence of inertial and gravitational mass, relations to curvature of space- time, ...
Dialogue, conflict, internal disunity, doubt, ... → Uncertainty in application of spiritual laws	Law of polarity (Yin-Yang principle): cyclical processes of the cosmos, elementary processes, karmic cycles, sleep-wake rhythm, day-night cycle, ... Law of Polarity = testimony of "law-violation" (incorrect application) that is based on an uncertainty, which brings the spirit to the cyclical waver (vicious spirals): the cyclical processes are the manifestations of these "think-spirals"	
Travels freely available in space- time; intake of bird's eye views (Overview to time events of Matter specific space-time)	Travels in the space-time possible without any special conversion processes (on mental/spiritual ways)	Travel of the body in space-time only (?) possible by conversion into subtle intermediate states (beaming); Time travel of the spirit for example possible in Trance / hypnosis without dematerializa- tion of the body
